Project #5: PeopleSoft Global Book Management (GBM) – Development, Unit Testing, Deployment

Client	: Credit Suisse Services India Pvt. Ltd.
Environment	: PS FSCM 9.2, People Tools 8.55
Database	: Oracle 12c
Platform	: Windows 10
Role	: Team Lead (PeopleSoft Technical Lead)
Team Size	: 12
Duration	: Jan 2019 – Till date

Description

PeopleSoft GBM is a customized system, which provides a front-end GUI to allow users to create and maintain Book and Department static data as well as Hierarchy roll-ups for specific trees. It has a workflow mechanism that automatically routes the request through various approval channels based on pre-defined rules. The system holds mappings between Book data in GBM and more than 50 transaction systems that are connected with GBM. The primary use of GBM is to serve as a Golden Source of information for all books and related attributes which originates from GBM defined across all applications globally.

Responsibilities:

- Developing and maintaining the Custom Components comprising of various Pages, Application Engines, Approval workflows etc as per the requirements.
- Customize the developed Components, Application Engines according to the Change Requests.
- Make test material/plan to validate development and modification of code.
- Involved in the code migration and deployments.
- Supporting the SIT and UAT.
- Coordinating the team as per requirements and schedules.
- Maintaining & preventing defects as a member of Quality Management Leads team.
- Examining systems applications issues, problems, improvements and present options for resolution.
- Team lead activities like resource planning and management, quarterly appraisal discussion, estimations and reporting etc.
